

The following document is the license for SimpleUtil, by Conner Vieira/VOLT.

Section 1: What you **can** do.

1A	You can...	As long as...
1A	Create content in the form of webpages, podcasts, videos, ebooks, etc. containing SimpleUtil programs.	You place credits to VOLT in a very clear and prominent place, in the following form: Program(s) used: {program name} from SimpleUtil, by VOLT (https://cvprogramming.tk/simpleutil.html) Simply change “{program name}” to the name/names of SimpleUtil programs you show in your content.
1B	Use SimpleUtil tools to assist in creation of other content without giving credit. (For example, using PowerUser to customize your computer to speed up image rendering, or using FFMPEGGen to create an encoding command to use on a video before it is uploaded).	Nothing directly from a SimpleUtil program is used in the content/product you publish. (For example, you can't publish a list of passwords generated with SGen, or an image of a SimpleUtil program, without giving credit as show in 1A).
1C	Install SimpleUtil programs on your MacOS system in any way you like.	No one other than yourself is affected by the install, and other users of the system have acknowledged and accept that you are installing the programs.
1D	Create programs that integrate with SimpleUtil programs to enhance a user's experience.	The programs aren't designed maliciously, and full credit is given to VOLT (See 1A). VOLT reserves the right to have any programs that associate with SimpleUtil taken down or deleted.

Section 2: What you **can't** do.

	You can't...	Even if...	Instead...
2A	Distribute SimpleUtil programs in any form.	You give credit to VOLT.	Provide a link to the download page on VOLT's website (https://cvprogramming.tk/simpleutil.html).
2B	Decompile, rework, or otherwise expose the code behind any SimpleUtil program.	You do not publish it.	Ask VOLT (cvieira@cvprogramming.tk) if you have any questions about the code behind the software.
2C	Say, imply, or claim that you've contributed to or created any of the software or content within SimpleUtil.	It is not in a publicly viewable form.	Provide clear credit to VOLT in any statements or content you distribute (See 1A).
2D	Download and publish, share, or distribute the SimpleUtil webpage from either https://cvprogramming.tk or https://v0lt.itch.io .	The page is unmodified and credit is given.	Provide a link to the webpage at https://cvprogramming.tk/simpleutil.html .

Section 2: What we **reserve the right to do**.

	We reserve the right to...	However, we will...
3A	Have any content in any form removed and/or deleted that is associated with SimpleUtil.	Accept appeals if you believe the request was unwarranted. This doesn't guarantee the content removal will be revoked.
3B	Place any content directly or indirectly affected by a SimpleUtil program anywhere on the VOLT site, or other VOLT controlled accounts.	Give the creator of the content credit, and they can request to get it removed if they wish.
3C	Ban any user or group of users from using SimpleUtil programs, and from publishing any content affected directly or indirectly by SimpleUtil programs.	Accept appeals if you believe the request was unwarranted. This doesn't guarantee the usage ban will be revoked.
3D	Change this license without notice.	Grant a pardon if a user understandably misses a license change, and fails to follow a newly created or adjusted term.
